

December 28, 2009 – FOR IMMEDIATE RELEASE

Unifi Technologies Announces Date for Unifi-Med EMR Partner Seminar in Arizona

BEND, Ore., December 27, 2009/ -- **Unifi Technologies** announces the date for its **Unifi-Med** EMR Partner Seminar to be held on January 20th in Scottsdale, Arizona.

Designed to educate partners on the power of the **Unifi-Med** EMR solution set, seminars have been scheduled throughout the United States to certify **Unifi-Med** Partners. The **Unifi-Med** EMR education is led by Chief Operating Officer, Randy Barnes.

“With the East Coast behind us we are trying to educate as many of our **Unifi-Med** partners in as much of the country as we can, as quickly as we can,” said Randy Barnes, “The excitement around EMR and the **Unifi-Med** solution has exceeded our every expectation. We attribute the interest in **Unifi-Med** to the unique approach to EMR that **Unifi** Technologies has taken. **Unifi-Med** is a completely web-based EMR product built on a cloud computing platform, the end user has no software to install which decreases costs associated with hardware, software licenses and IT staff, and increases the speed of installation. **Unifi-Med** is also flexible built around the needs of the physician and as a modular solution the physician can choose Clinical, Patient or Practice Management portals. They can select a single module or install all three as they are fully integrated. With a lower the cost of ownership doctors have access to a fiscally sound EMR solution that works the way they do. **Unifi-Med** provides a unique, yet simple approach, to the complex world of EMR.”

To learn more about becoming a **Unifi** Partner or the **Unifi-Med** EMR Partner Seminars please email info@unifitech.com. You can view all of **Unifi’s** events on the **Unifi** Technologies Facebook page or visit www.unifitech.com.
